Question: 1

Which of the following best describes the purpose of the planning phase in Spectrum Protect Plus deployment?

- A. Identifying hardware requirements
- B. Configuring retention policies
- C. Establishing data protection schedules
- D. Determining the scope and objectives of the deployment

Answer: D

Explanation: The planning phase in Spectrum Protect Plus deployment involves determining the scope and objectives of the deployment. This includes identifying the specific data protection requirements, understanding the existing infrastructure, and defining the goals and objectives of the deployment.

Question: 2

Which of the following options correctly describes the purpose of planning in Spectrum Protect Plus deployment?

- A. Configuring retention policies
- B. Establishing data protection schedules
- C. Determining the scope and objectives of the deployment
- D. Identifying hardware requirements

Answer: C

Explanation: Planning in Spectrum Protect Plus deployment involves determining the scope and objectives of the deployment. This includes identifying the specific data protection requirements, understanding the existing infrastructure, and defining the goals and objectives of the deployment.

Question: 3

Which of the following activities falls under the administration tasks in Spectrum Protect Plus?

- A. Defining data retention policies
- B. Configuring backup storage targets
- C. Creating backup schedules
- D. Managing user access and permissions

Answer: D

Explanation: Administration tasks in Spectrum Protect Plus involve managing user access and permissions. This includes creating user accounts, assigning roles and privileges, and enforcing access controls to ensure that only authorized users have the necessary permissions to perform data protection and recovery operations.

Question: 4

During the acquisition and deployment of Spectrum Protect Plus software, which of the following tasks should be performed last?

- A. Configuring backup storage targets
- B. Creating backup schedules
- C. Installing and configuring the Spectrum Protect Plus server
- D. Configuring retention policies

Answer: D

Explanation: Configuring retention policies is typically one of the final tasks in the acquisition and deployment of Spectrum Protect Plus software. After setting

up the Spectrum Protect Plus server, configuring backup storage targets, and creating backup schedules, the next step is to define the retention policies that govern how long the backup data should be retained.

Question: 5

Which of the following options correctly describes the purpose of configuration in Spectrum Protect Plus?

- A. Defining data retention policies
- B. Configuring backup storage targets
- C. Creating backup schedules
- D. Establishing disaster recovery plans

Answer: B

Explanation: Configuration in Spectrum Protect Plus involves setting up the backup storage targets. This includes configuring the storage repositories, such as local disks or cloud storage, where the backup data will be stored. It also involves defining the storage settings and policies, such as compression and deduplication, for optimal data protection.

Question: 6

Which of the following tasks is part of the data protection and recovery operations in Spectrum Protect Plus?

- A. Configuring retention policies
- B. Creating backup schedules
- C. Monitoring backup performance
- D. Installing the Spectrum Protect Plus server

Answer: C

Explanation: Data protection and recovery operations in Spectrum Protect Plus involve monitoring backup performance. This includes tracking the progress of backup jobs, verifying the integrity of backup data, and ensuring that the backups are completed within the defined backup windows. Monitoring backup performance helps in identifying and resolving any issues or bottlenecks that may impact the data protection process.

Question: 7

During the acquisition and deployment of Spectrum Protect Plus software, which of the following tasks should be performed first?

- A. Configuring backup storage targets
- B. Creating backup schedules
- C. Installing and configuring the Spectrum Protect Plus server
- D. Configuring retention policies

Answer: C

Explanation: The first step in the acquisition and deployment of Spectrum Protect Plus software is to install and configure the Spectrum Protect Plus server. This involves setting up the server environment, installing the software, and configuring the necessary settings to enable data protection and recovery operations.

Question: 8

During problem determination in Spectrum Protect Plus, which of the following activities should be performed first?

- A. Analyzing log files
- B. Restarting the Spectrum Protect Plus services

- C. Checking system resource utilization
- D. Verifying network connectivity

Answer: C

Explanation: In problem determination, the first step is to check the system resource utilization. This involves monitoring CPU, memory, and storage usage to identify any resource constraints or bottlenecks that may be causing performance issues or failures. By assessing the system resource utilization, you can determine if the problem is related to resource limitations.

SAMPLE QUESTIONS

*These questions are for demo purpose only. **Full version** is up to date and contains actual questions and answers.*

Killexams.com is an online platform that offers a wide range of services related to certification exam preparation. The platform provides actual questions, exam dumps, and practice tests to help individuals prepare for various certification exams with confidence. Here are some key features and services offered by Killexams.com:

Actual Exam Questions: *Killexams.com provides actual exam questions that are experienced in test centers. These questions are updated regularly to ensure they are up-to-date and relevant to the latest exam syllabus. By studying these actual questions, candidates can familiarize themselves with the content and format of the real exam.*

Exam Dumps: *Killexams.com offers exam dumps in PDF format. These dumps contain a comprehensive collection of questions and answers that cover the exam topics. By using these dumps, candidates can enhance their knowledge and improve their chances of success in the certification exam.*

Practice Tests: *Killexams.com provides practice tests through their desktop VCE exam simulator and online test engine. These practice tests simulate the real exam environment and help candidates assess their readiness for the actual exam. The practice tests cover a wide range of questions and enable candidates to identify their strengths and weaknesses.*

Guaranteed Success: *Killexams.com offers a success guarantee with their exam dumps. They claim that by using their materials, candidates will pass their exams on the first attempt or they will refund the purchase price. This guarantee provides assurance and confidence to individuals preparing for certification exams.*

Updated Content: *Killexams.com regularly updates its question bank and exam dumps to ensure that they are current and reflect the latest changes in the exam syllabus. This helps candidates stay up-to-date with the exam content and increases their chances of success.*

Technical Support: *Killexams.com provides free 24x7 technical support to assist candidates with any queries or issues they may encounter while using their services. Their certified experts are available to provide guidance and help candidates throughout their exam preparation journey.*
