Question: 45

The hypermetabolic state accompanying infection, injury or burns is characterized by:

- A. 10% decrease in BMR
- B. Increased gluconeogenesis
- C. Decreased glycogenolysis
- D. Increased ketosis

Answer: B

The hypermetabolic state accompanying infection, injury, or burns is characterized by increased gluconeogenesis. Increased gluconeogenesis occurs to raise blood glucose to meet the high energy demands of healing, which can raise the BMR by as much as 100%. Glycogenolysis is also increased to raise blood glucose, but ketosis is suppressed, because of hormonal regulation of the sympathetic nervous system.

Question: 46

Stomatitis is treated with which of the following dietary interventions?

- A. Supplementation with iron
- B. Clear liquid diet
- C. Avoidance of acidic and spicy foods
- D. A & C

Answer: D

Stomatitis is an inflammation of the mucous membranes of the mouth. It may be caused by iron deficiency, in which case it is treated with iron supplementation. The usual dietary regimen is avoidance of acidic and spicy foods.

Question: 47

Low-salt syndrome may be caused by:

- A. Extreme sodium restriction due to congestive heart failure
- B. Decreased glomerular filtration rate
- C. Adrenal gland insufficiency

D. All of the above

Answer: D

Low-salt syndrome is occasionally seen in individuals with congestive heart failure who are being treated with severe sodium restriction. It may also be caused by decreased glomerular filtration rate in renal disease, and by adrenal gland insufficiency, both of which affect the body's ability to retain sodium.

Question: 48

Fluid needs are highest in which group?

- A. Infants less than 12 months of age
- B. Elderly greater than 80 years of age
- C. Children 5-10 years of age
- D. Lactating women

Answer: A

Fluid needs are highest in infants less than 12 months of age, due to the small size of their kidneys and inability to retain large amounts of water. Fluid needs in young infants are about 150 ml/kg body weight per day, as compared to adults who require about 30-35 ml/kg body weight.

Question: 49

The primary immunoglobulin in human breast milk is:

- A. Beta lymphocytes
- B. IgM antibody
- C. Iron-binding lactoferrin
- D. Secretory IgA

Answer: D

The primary immunoglobulin in human breast milk is secretory IgA, which protects the infant gastrointestinal tract from infection caused by many pathogens. Beta lymphocytes are produced by the bone marrow and provide humoral

immunity, while IgM antibody is involved in allergic response to antigens. Iron-binding lactoferrin is a protein which slows the growth of bacteria in the infant gut; its action is secondary to that of secretory IgA.

*These questions are for demo purpose only. **Full version** is up to date and contains actual questions and answers.*

Killexams.com is an online platform that offers a wide range of services related to certification exam preparation. The platform provides actual questions, exam dumps, and practice tests to help individuals prepare for various certification exams with confidence. Here are some key features and services offered by Killexams.com:

Actual Exam Questions: *Killexams.com provides actual exam questions that are experienced in test centers. These questions are updated regularly to ensure they are up-to-date and relevant to the latest exam syllabus. By studying these actual questions, candidates can familiarize themselves with the content and format of the real exam.*

Exam Dumps: *Killexams.com offers exam dumps in PDF format. These dumps contain a comprehensive collection of questions and answers that cover the exam topics. By using these dumps, candidates can enhance their knowledge and improve their chances of success in the certification exam.*

Practice Tests: *Killexams.com provides practice tests through their desktop VCE exam simulator and online test engine. These practice tests simulate the real exam environment and help candidates assess their readiness for the actual exam. The practice tests cover a wide range of questions and enable candidates to identify their strengths and weaknesses.*

Guaranteed Success: *Killexams.com offers a success guarantee with their exam dumps. They claim that by using their materials, candidates will pass their exams on the first attempt or they will refund the purchase price. This guarantee provides assurance and confidence to individuals preparing for certification exams.*

Updated Content: *Killexams.com regularly updates its question bank and exam dumps to ensure that they are current and reflect the latest changes in the exam syllabus. This helps candidates stay up-to-date with the exam content and increases their chances of success.*

Technical Support: *Killexams.com provides free 24x7 technical support to assist candidates with any queries or issues they may encounter while using their services. Their certified experts are available to provide guidance and help candidates throughout their exam preparation journey.*
