Question: 156

What type of cloud security control is log auditing?

A. Detective control
B. Corrective control
C. Preventive control
D. Technical control

Answer: A

Question: 157

Which risk management step deploys various security mechanisms that minimize risks impacts?

A. Identification
B. Mitigation
C. Assessment
D. Monitoring

Answer: B

Question: 158

Which cloud security design principle prevents an individual from improper access or system misuse?

A. Least privilege
B. Data privacy and ownership
C. Separation of duties
D. Secure multitenancy

Answer: C

Question: 159

Which function collects information about competing service offerings?

A. Service performance management
B. Service portfolio management
C. Service operations management
D. Service demand management

Answer: B

Question: 160

Which compute system component contains boot firmware?

A. Operating System
B. Hard Disk Drive
C. Read Only Memory
D. Random Access Memory

Answer: C

Question: 161

What is the primary goal of a business continuity solution?

A. Reduce the amount of investment in protecting an organizationâs business-related data
B. Decreases likelihood of a disaster in a data protection environment to control the loss of data
C. Ensure data availability that is required to conduct vital business operations
D. Eliminate security threats in a data protection environment for continuous access to data

Answer: C

Question: 162

An organization requires double the processing capacity for a specific duration to handle increased workload. For the remaining period, the organization might want to release the idle resources to save costs. The workload variations may be seasonal or transient.

Which cloud characteristic enables the consumer to handle such variations in workloads and IT resource requirements?

A. Resource pooling
B. On-demand self-service
C. Rapid elasticity

Answer: C

Question: 163

Which is true about a type 2 hypervisor?

A. Installed as an application on an operating system
B. Installed on bare-metal hardware
C. Hypervisor vendor must certify the hardware

Answer: A

Question: 164

What is a benefit of link aggregation?

A. Saves bandwidth by restricting traffic to a specific potentially congested ISL
B. Improves performance by combining two or more parallel ISLs into a single physical ISL
C. Optimizes fabric performance by distributing network traffic across ISL
D. Improves ISL utilization by increasing the network traffic on a specific ISL

Answer: C

Question: 165

What enables resource pooling and multi-tenancy in a cloud environment?

A. Rapid elasticity
B. On-demand provisioning
C. Scalability
D. Virtualization

Answer: D

Question: 166

Which tool should be recommended to customers for Infrastructure automation?

A. GitHub
B. Docker
C. Chef
D. JARVIS

Answer: C

Question: 167

An organization must deploy remote replication between two sites that are 1200 km (745 miles) apart, without impacting application response time.

Which solution should be recommended?

A. Hypervisor-based synchronous replication
B. Synchronous replication
C. Asynchronous replication

Answer: C

Question: 168

DRAG DROP

What is the correct sequence of steps in the service catalog design and implementation process?

Steps   **Answer area**

Publish service

Define fulfillment process

Define service request

Create service definition

- wrong

Answer: C

Explanation:

Question: 169

Why do organizations take advantage of virtual infrastructure?

A. Require more data center space -
Resource underprovisioning -
Organizations have overutilized resources
B. Organizations have underutilized resources
Ability to overprovision resources
Require more data center space
C. Require no data center space -
Organizations have underutilized resources
Ability to overprovision resources
D. Resource underprovisioning -
Organizations have overutilized resources
Require no data center space

Answer: B

Question: 170

What helps to recover the cost of providing the service, ensuring profitability, and meeting the providerâs return on investment and reinvestment goals?

A. Service negotiation
B. Service level objective
C. Service valuation
D. Service level agreement

Answer: C

Question: 171

Which type of cloud tool controls resources such as compute, storage, and network?

A. Management and operation
B. Automation and orchestration
C. Collaboration and communication
D. Monitoring and alerting

Answer: B

Question: 172

What provides workflows for performing automated tasks to accomplish a desired outcome?

A. Cloud services
B. Orchestration
C. Software defined infrastructure
D. Virtual infrastructure

Answer: B

Question: 173

An administrator must design a fault-tolerant IT environment for applications.

Which techniques meet this requirement?

A. Active/Passive for Compute -
NIC Teaming for Network -
Dual disks for storage
B. Active/Active for Compute -
Link Aggregation for Network -
Erasure Coding for storage
C. Active/Passive for Compute -
Spanning for Network -
Dynamic Disk Sparing for storage
D. Active/Standby for Compute -
Multipathing for Network -
RAID for storage

Answer: B

Question: 174

Which cloud security objective provides the required secrecy of information to ensure that only authorized users have access to data held within the cloud?

A. Integrity
B. Authorization
C. Authentication
D. Confidentiality

Answer: D

Question: 175

What activity is performed during the service creation phase of the cloud service lifecycle?

A. Defining Service Template
B. Developing Service Enablement Roadmap
C. Assessing Service Requirements
D. Establishing Billing Policy

Answer: C

Special Discount Coupon

Actual Exam Questions: Killexams.com provides actual exam questions that are experienced in test centers. These questions are updated regularly to ensure they are up-to-date and relevant to the latest exam syllabus. By studying these actual questions, candidates can familiarize themselves with the content and format of the real exam.

Exam Dumps: Killexams.com offers exam dumps in PDF format. These dumps contain a comprehensive collection of questions and answers that cover the exam topics. By using these dumps, candidates can enhance their knowledge and improve their chances of success in the certification exam.

Practice Tests: Killexams.com provides practice tests through their desktop VCE exam simulator and online test engine. These practice tests simulate the real exam environment and help candidates assess their readiness for the actual exam. The practice tests cover a wide range of questions and enable candidates to identify their strengths and weaknesses.

Guaranteed Success: Killexams.com offers a success guarantee with their exam dumps. They claim that by using their materials, candidates will pass their exams on the first attempt or they will refund the purchase price. This guarantee provides assurance and confidence to individuals preparing for certification exams.

Updated Content: Killexams.com regularly updates its question bank and exam dumps to ensure that they are current and reflect the latest changes in the exam syllabus. This helps candidates stay up-to-date with the exam content and increases their chances of success.

Technical Support: Killexams.com provides free 24x7 technical support to assist candidates with any queries or issues they may encounter while using their services. Their certified experts are available to provide guidance and help candidates throughout their exam preparation journey.
